

VOK

Vok Bikes | Product Catalogue

The right vehicle for urban logistics

Innovative 4Drive™ technology

60% cost-saving compared to a van

Vok blends the reliability of automotive engineering with the agility of a bike. Unlike vans, there's no sitting in traffic or circling for parking. Just smooth, efficient movement through the city.

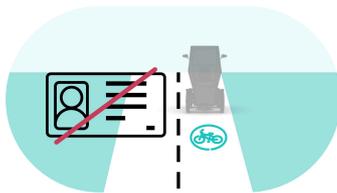

Category	E-bike	Range	Up to 100 km
Nominal power	250 W	Charging	Swappable batteries or 6h until full
Top speed	25 km/h	Drive	2WD/4WD

MOVING BILLBOARD

Wrapped in your brand colors and messaging, Vok is your moving advertisement.

NO DRIVER'S LICENCE

Simplify your hiring process and expand your pool of potential personnel.

ALL AREAS ACCESS

Reach places vans can't, such as pedestrian and low-emission zones, and narrow streets.

SAVE 60% ON COSTS

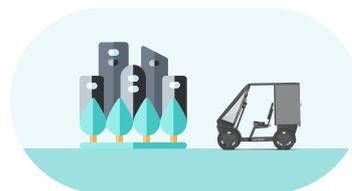

Compared to a small city van, you can save up to 60% on total ownership costs in 5 years.

NAVIGATE 40-75% FASTER

Navigate urban traffic 40-75% faster than cars and vans thanks to Vok's compact design, bike-lane access, and effortless parking.

IMPROVE YOUR CITY

Drive real change with up to 95% lower carbon emissions than petrol vehicles, and make meaningful progress on your CSR commitments.

100 km cost

Vok	1.33€
Small van	9.21€

No wasted space

In cities like London, 66% of vans use **less than half** of their cargo space.

Zero-emission zones

By 2030, **hundreds of zero-emission zones (no access)** will reshape urban mobility in Europe.

VOK S

+VAT

Price from **9,990€***

Payload	120 kg
Cargo space	0.4 m ³ D: 570 W: 660 H: 1010 mm
Drive	2WD/4WD
Vehicle mass	176 kg
Key benefit	Compact and nimble

VOK XL

+VAT

Price from **14,490€***

Payload	200 kg
Cargo space	2 m ³ D: 1593 W: 850 H: 1455 mm
Drive	4WD
Vehicle mass	241 kg
Key benefit	Spacious cargo box

VOK U

+VAT

Price from **14,490€***

Payload	200 kg
Cargo space	Pick-up D: 1470 W: 810 H: 300 mm
Drive	4WD
Vehicle mass	231 kg
Key benefit	Tilting open cargo box

4DRIVE™ TECHNOLOGY BY VOK BIKES

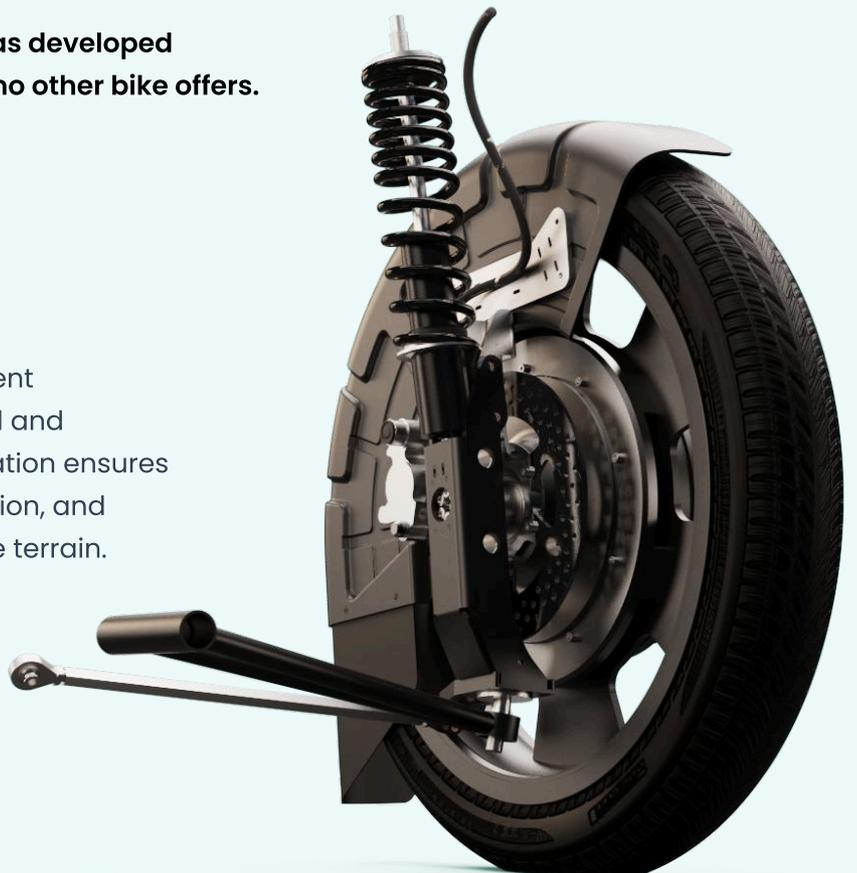

Automotive grade drivetrain system for ebikes

Vok Bikes' in-house engineering team has developed technology, custom parts, and features no other bike offers.

OPTIMIZED DYNAMICS FOR PEAK RIDE STABILITY AND CONTROL

The 4Drive™ system integrates independent suspension with precision traction control and custom-tuned hub motors. This configuration ensures optimal wheel response, minimizes vibration, and enhances vehicle stability across variable terrain.

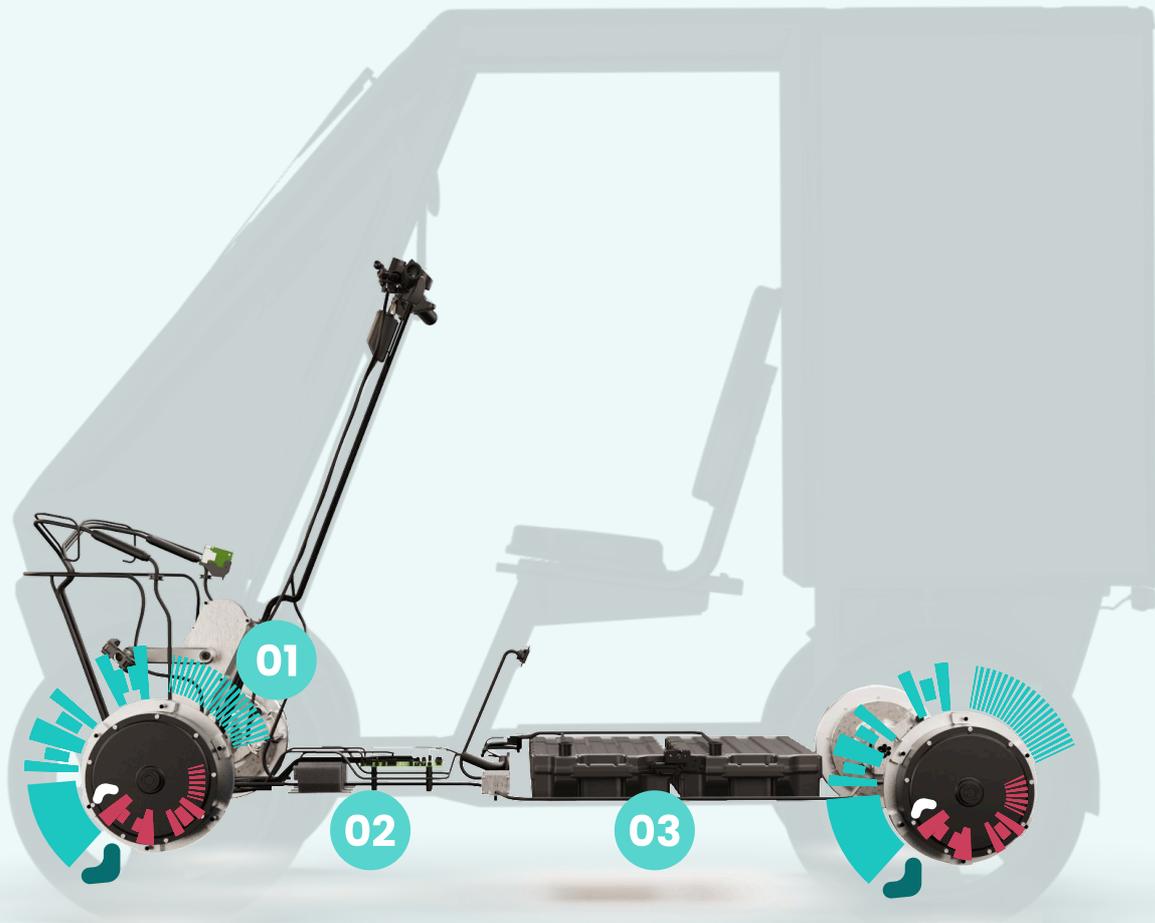

Combined with regenerative braking and torque vectoring, the system delivers superior handling, shorter stopping distances, and unmatched safety in all weather conditions.

● **3x longer maintenance cycle**

● **38% lower cost**

● **Superior riding experience**

**ACCELERATE
BRAKE / REVERSE**

LEADING TECHNOLOGY

UNIQUENESS

BENEFITS

01 SERIES HYBRID

The only fully electric drivetrain combining **speed control, reverse gear, and regenerative braking.**

Increasing the brake service interval to far beyond what is possible with mechanical brakes only.

02 VEHICLE CONTROL UNIT

Sole provider of **4WD** with exclusive features like **traction control, e-ABS, and independent torque control.**

ADAS - reduced stopping distances and improved handling in difficult weather conditions.

03 HIGH ENERGY DENSITY BATTERY

Only Nordic-grade swappable battery with heating available on the market.

Powerful temperature control system enables **full performance in winter conditions** without battery degradation.

CUSTOMIZE & ADJUST

Made for every job in the city

LAST-MILE DELIVERY

Efficient deliveries through congested city streets right to the customer's doorstep.

RESTAURANT DELIVERY

Keep meals hot and operations agile. Navigate traffic and tight delivery windows with ease.

FRESH GOODS SUPPLIERS

Deliver perishable products quickly and sustainably while preserving freshness.

ADVERTISING

Turn every ride into a moving billboard. High-visibility marketing with zero-emission impact.

FACILITY MANAGEMENT

Move tools and supplies across urban campuses or city zones quickly and without parking hassle.

SERVICE PROVIDERS

Perfect for plumbers, cleaners, mobile repair crews, and all other micro-service vendors.

MUNICIPALITIES & PUBLIC SECTOR

Support public works and green initiatives with a vehicle built for efficiency and sustainability.

CUSTOM SOLUTIONS

Tailored to fit unique business needs: from modular builds to custom branding.

Sukhpal Ahluwalia, Executive Chairman at GSF

Vok Bikes allow GSF to deliver to our customers in record time.

Marten Seepter, Head of Transportation at Omniva

Unlike regular bikes, we can also deliver parcels with Voks.

Jeremy Lewis-Phillips, Director at Handyman Station

With Vok, we can go to places others can't.

Thea Marks, COO at Donutelier

The Vok bike not only facilitates important daily logistics, but is beautifully branded!

Angelino Capretti, Founder at Urbeez

In Brussels, you need tough gear. Vok helps us cut a major variable cost and that changes everything for our profitability.
